Started working on my web developer
projects, focusing on HTML, CSS and
JavaScript

2024 - 2024
Student

As a GIAIC Student

Advance to front-end development
with a focus on frame works like
React.js.

2024 - 25
Student

As a GIAIC Student

Started working on back-end
development with a focus on Next.js.

2024 - 2024
Student

As a GIAIC Student

Advanced to full-stack development
with a focus on database

2025 - 2025
Rising Star

OBJECTIVE

As a stenographer and frontend developer, my objective is to seamlessly bridge the gap between technology and communication. In stenography, I aim to accurately capture and transcribe spoken words in real-time, ensuring precision and clarity in every session. As a frontend developer, I strive to create intuitive and visually appealing user interfaces, enhancing user experience while adhering to best practices in coding and design. Ultimately, my goal is to combine these skills to deliver effective, efficient, and accessible solutions that meet both functional and aesthetic needs.
